

FUELTEK FM Software is the market leading fuel management software from Fueltek. The **FUELTEK FM** package is simple to use and understand, yet flexible enough to fulfil the many different demands that may be made of it. The FM package incorporates a reports generator that will give you concise information in the format you want, as and when you want it. The user only has four main screens to contend with, each screen relates to a particular aspect of your fuelling operation, each main screen has a number of sub- screens, these are easy to navigate once the main screen is accessed, the term 'user friendly' can be truly applied to the Fueltek FM Software.

For reporting purposes data is downloaded from the FACT via a communication link to an existing central PC running windows based **FUELTEK FM** software that allows reports to be viewed and / or printed from an existing PC / Printer set-up. The software can be installed and viewed on a single or multiple PC's . The FACT captures all fuelling transactions that take place, the **FUELTEK FM** PC software will download and process the fuelling transactions and put them into a readable report format.

Although **FUELTEK FM** incorporates some standard report formats for ease of use, the software incorporates a reports generator which gives you the ability to create and customise your own reports if required. Data can be imported from your fuel card supplier and off-site fuelling integrated with your on-site fuelling to enable you to produce accurate MPG figures when producing reports. Data can also be exported from the **Fueltek FM** Software be exported to any other Windows based package.

The main tasks of **FUELTEK FM** PC software are:-

- Communications to the fuelling terminal
- Programming Vehicle Datatags / Fueller Datatags/ Driver Detail
- Maintaining tables (Driver\Fueller\ Lockout)
- Running Reports
- Stock Control
- Backing up data periodically

- SINGLE OR MULTIPLE USER.
- SINGLE OR MULTIPLE SITE.
- EASY TO USE DATA EXPORT FACILITY.
- EASY TO USE AUTOMATED IMPORT FACILITY FOR OFFSITE FUELLING ENTRIES.
- NO LIMITS ON FLEET SIZE.

FUELTEK FUEL MANAGER - PC software Main Features.

- Windows Based Software (Compatible with any 32 - Bit Windows Platforms)
- Multiple or Single Site
- User friendly Reports Generator: -
- Flexible and easy to use
- Data export to other software packages
- Accepts offsite-fuelling data from all major card companies.
- Date and time filtered reports.
- Vehicle Totals Report
- Individual Transaction Reports
- Vehicle, Group, Department reports with mpg's
- Site stock reports
- Low Stock/Re-order Alarms
- Driver reports
- Service due reports

PC SPECIFICATION REQUIRED.

To run the **Fueltek FM** software successfully the minimum PC requirement is as follows, 200 MHz processor or greater, 32 Mb of RAM, 20 Mb of free hard disc space, the PC must have at least one free serial port and have a monitor capable of running 800 x 600 graphics.
